

United Cooperative Services ERCOT Power Supply Resources RFP

Summary:

United Cooperative Services is seeking up to 300 MW of power supply and/or generation resources to serve its ERCOT load in 2028 and beyond. All proposal types and transaction structures will be considered, including generation-asset purchases, 2–20 year contracts, partial ownership interests, call options, and other supply arrangements. January 1, 2028 is the preferred commencement date, but earlier or later delivery will be considered. United prefers dependable, dispatchable capacity backed by physical resources and will favor proposals that enhance reliability, provide dispatch rights and capacity attributes, and deliver to the ERCOT North Load Zone. ACES is administering the RFP.

Specified Portfolio and Scope:

Item	Specified Scope
Capacity	Up to 300 MW
Delivery	North Load Zone preferred; North Hub second
Commencement	January 1, 2028 preferred; earlier or later considered
Structures	Asset purchase; 2–20 year contract; partial ownership; call option; other
Multiple Proposals	Allowed; identify mutually exclusive offers
Physical Resources	Dispatch rights and applicable capacity attributes preferred

Bid Schedule:

Event	Date
RFP Issued	01-Oct-2026
Questions Due	15-Oct-2026
Proposal Submission Deadline	23-Oct-2026, 5:00 PM CDT
Shortlist Notification	20-Nov-2026
Phase 2 Proposals Due	11-Dec-2026, 5:00 PM CST
Final Results	21-Jan-2027
Contract Negotiation and Execution	Q1 2027

Respondents are responsible for all approvals, licenses, permits and variances needed to construct or operate generation and interconnection facilities, and for compliance with ERCOT resource requirements. New-generation proposals should identify the COD schedule, development risks, interconnection status, site control, permitting status, and permitting timeline through the interconnection point.

Mandatory Requirements:

Appendix A must be received electronically at United2026RFP@acespower.com by 5:00 p.m. CDT on October 23, 2026. Proposals sent directly to United or ACES personnel will not be evaluated, and direct contact outside the designated RFP channels may result in disqualification. Supporting documentation is encouraged but is not mandatory.

Pricing must address all costs and applicable basis costs, including responsibility for moving power from the source node to the North Hub and/or North Load Zone. Fuel-based proposals must clearly allocate fuel procurement, nomination and service responsibilities. Respondents should expect collateral in cash or lines of credit unless supported by an investment-grade parent guarantee.
