SAN DIEGO COMMUNITY POWER | SOLAR ADVANTAGE DAC-GT RFO

CALIFORNIA / CAISO • SOLAR PV + OPTIONAL PAIRED BESS • RFO ID: DAC-GT RFO #3

PROCUREMENT SIZE	RESOURCE TYPE	TARGET COMMENCEMENT	BID DEADLINE
15.51 MW; MAY EXCEED	NEW SOLAR PV + BESS	COD BY 31 DEC 2030	30 OCT 2026

01 | PROCUREMENT OVERVIEW

Procuring Entity	San Diego Community Power (SDCP)
Resource Requirements	SDCP may procure more than 15.51 MW, subject to remaining capacity within its 20.16 MW DAC-GT authorization. Individual PV offers: 0.5-20 MWAC.
Eligible Geography	CAISO; project site and electrical connection must be in SDG&E service territory and in or within 5 miles of an eligible disadvantaged community.
Delivery Requirements	Deliver at the generator node / point of interconnection; include energy, PCC1 RECs and Capacity Attributes. BESS RA may be offered if available.

02 | COMMERCIAL & CONTRACTUAL TERMS

Transaction Structure	20-year PPA. PV priced in fixed $/MWh; optional paired BESS under a bundled full-toll $/kW-month structure. No escalation.
Contract Tenor	20 years from initial delivery; COD no later than 31 Dec 2030.
Key Commercial Terms	Short listees must sign a term sheet and at least 90-day exclusivity agreement; $3,000/MW deposit on combined guaranteed PV+BESS capacity due within 7 business days after SDCP executes exclusivity.
Credit & Security	Conflicting official documents: Appendix A lists $75/kW development and performance security; draft term sheets list $90/kW development and $105/kW performance security. Confirm with SDCP.

03 | ELIGIBILITY & TECHNICAL REQUIREMENTS

Project Readiness	New-build only. Provide site control or option, SDG&E pre-application report, financing plan, 2 years of audited financials, development schedule, permitting status, site plan and single-line diagram.
Interconnection Status	Distribution projects must follow SDG&E WDAT. Include latest interconnection document if available and estimated costs using SDG&E's current Unit Cost Guide.
Technical Criteria	CEC RPS-eligible PV; WREGIS transfer; 12x24 and 8760 profiles. Optional BESS must be paired, at or below PV nameplate and at least 4 hours. Standalone BESS is ineligible.
Material Restrictions	Fixed pricing must be at or below the confidential CCA cap; prevailing wages apply to all subcontractor tiers. Q&A says FCDS is preferred, not required; the draft PV+BESS term sheet states FCDS is required, so confirmation is needed.

04 | CRITICAL DATES & SUBMISSION

Intent to Bid / Registration	No NOI or registration requirement stated; bidder webinar held 09 Sep 2026 at 10:00 a.m. PDT.
Clarifications / Q&A	Questions close 16 Sep 2026 at 5:00 p.m. PDT; final Q&A posted 23 Sep 2026.
Proposal Submission	30 Oct 2026 | 5:00 p.m. PDT
Submission Portal	Submit through the SDCP online RFO Submission Form using the unmodified offer workbook, completed offer tabs and required project narrative attachments.

05 | HOW SUNSTRIPE CAN SUPPORT

PRE-RFP DEVELOPMENT & ENGINEERING

- Solar / BESS sizing and configuration
- Site technical due diligence
- 10% preliminary engineering design
- Interconnection (IX) application support
- PSS®E / PSCAD modelling and validation

RFP SUBMISSION & BID SUPPORT

- Technical proposal preparation
- Bid compliance and documentation
- CAPEX estimation and cost modelling
- Bid engineering and submission support
