PSCO | 2026 JUST TRANSITION ALL-SOURCE RFP

COLORADO / PSCO • GENERATION, STORAGE & ADER • RFP ID: 2026 JTS PHASE II / 24A-0442E

PROCUREMENT SIZE	RESOURCE TYPE	TARGET COMMENCEMENT	BID DEADLINE
VARIES | 931 MW PEAK	ALL-SOURCE EXCEPT COAL	BY 31 DEC 2031	08 DEC 2026

01 | PROCUREMENT OVERVIEW

Procuring Entity	Public Service Company of Colorado (PSCo), an Xcel Energy subsidiary
Resource Requirements	All-source except coal, including gas, solar, wind, storage, hybrids, hydro, geothermal, biomass, recycled energy and ADER/VPP. Summer need varies by year and peaks at 931 MW in 2030; this is not a fixed award target.
Eligible Geography	New, existing, repowered and extended resources may qualify. ADER/VPP capacity must come from current PSCo customers in its service territory; Denver metro is preferred for ADER.
Delivery Requirements	Firm delivery to a receipt point on PSCo's transmission system is required. Bidders are responsible for applicable interconnection and delivery arrangements and costs.

02 | COMMERCIAL & CONTRACTUAL TERMS

Transaction Structure	PPA, build-own-transfer, existing-asset sale, company self-build, PPA extension, repower or joint venture
Contract Tenor	PPA: 1-25 years. Hybrid capacity component: up to 18 years unless the entire hybrid uses one variable-energy payment rate.
Key Commercial Terms	Fixed flat or escalating PPA pricing; all power, RECs and environmental benefits transfer to PSCo. Contract execution is subject to Colorado PUC approval.
Credit & Security	Initial fee per proposal: $1,500 (>2-5 MW), $3,000 (>5-10 MW), $10,000 (>10 MW). Selected negotiations require a refundable $1/kW second fee. Clarify the initial fee for PPA bids >100 kW to 2 MW.

03 | ELIGIBILITY & TECHNICAL REQUIREMENTS

Project Readiness	Document relevant experience, site-control pathway, permits, financing, equipment plan, land rights and a credible schedule. New assets must reach COD by 31 Dec 2031.
Interconnection Status	Provide a firm-delivery and interconnection plan. Each material change to COD, size, structure, tenor, pricing or interconnection point is generally a separate proposal and fee.
Technical Criteria	Ownership bids: >2 MW; PPAs: >100 kW. Storage: at least 4 hours and 275 full-equivalent cycles/year. Inverter-based resources must be grid-forming capable and meet stated IEEE 2800 requirements.
Material Restrictions	Coal is excluded. Non-negotiable model-contract terms must be accepted. ADER must be incremental to existing PSCo demand-response and efficiency programs; unapproved contact may disqualify a bidder.

04 | CRITICAL DATES & SUBMISSION

Intent to Bid / Registration	Mandatory NOIR via Microsoft Forms: 17 Nov 2026 | 4:00 p.m. MT. No NOIR fee; missing the deadline prevents bid submission.
Clarifications / Q&A	Use PSCo2026AllSource@XcelEnergy.com. Written questions and answers are posted periodically in the RFP FAQ.
Proposal Submission	Third-party proposals: 08 Dec 2026 | 4:00 p.m. MT. Company self-build proposals: 07 Dec 2026 | 4:00 p.m. MT.
Submission Portal	After NOIR, PSCo issues the Bidder ID, wire instructions and bidder-specific XpressDRIVE link. Upload each package as a ZIP; physical, mailed and email bids are not accepted.

05 | HOW SUNSTRIPE CAN SUPPORT

PRE-RFP DEVELOPMENT & ENGINEERING

- Solar / BESS sizing and configuration
- Site technical due diligence
- 10% preliminary engineering design
- Interconnection (IX) application support
- PSS®E / PSCAD modelling and validation

RFP SUBMISSION & BID SUPPORT

- Technical proposal preparation
- Bid compliance and documentation
- CAPEX estimation and cost modelling
- Bid engineering and submission support
