DOMINION ENERGY VIRGINIA | 2026 DEVELOPMENT ASSET ACQUISITION

VIRGINIA / PJM • SOLAR, WIND & ENERGY STORAGE • RFP ID: 2026 DEVELOPMENT ASSET ACQUISITION

PROCUREMENT SIZE	RESOURCE TYPE	TARGET COMMENCEMENT	BID DEADLINE
NOT DISCLOSED	SOLAR / WIND / STORAGE	BIDDER-PROPOSED COD	ROLLING

01 | PROCUREMENT OVERVIEW

Procuring Entity	Dominion Energy Virginia (Virginia Electric and Power Company)
Resource Requirements	Aggregate acquisition quantity is not disclosed. Eligible assets include new PV, onshore wind, co-located renewable plus storage, and standalone short- or long-duration storage.
Eligible Geography	All projects must be in Virginia. DER assets must be in Dominion's service territory, distribution-connected and provide locational grid benefits.
Delivery Requirements	Dominion seeks 100% of development assets and exclusive output, including RECs. Utility-scale assets outside its service territory may qualify if in Virginia and properly interconnected.

02 | COMMERCIAL & CONTRACTUAL TERMS

Transaction Structure	Fully developed / pre-NTP asset acquisition or build-transfer at mechanical or substantial completion. PPAs are excluded from this RFP.
Contract Tenor	Not applicable - this is an asset acquisition. Bidder proposes COD; alignment with annual development targets is prioritized.
Key Commercial Terms	Price only in $/WDC for solar and $/WAC for wind or storage. No material contingencies; no participation fee.
Credit & Security	Financial / guarantor support as applicable; executed exclusivity required. Accept the Purchase Agreement or submit execution-ready redline and clean copies.

03 | ELIGIBILITY & TECHNICAL REQUIREMENTS

Project Readiness	EPC-ready / pre-NTP preferred. Provide full site control, permits, credible schedule, environmental diligence, studies, financial capability and team qualifications.
Interconnection Status	Assigned queue and studies required. Distribution: Chapter 314 number, initial study agreement and deposit. PJM: System Impact Study I preferred.
Technical Criteria	Solar: utility >3 MWAC; DER <=3 MWAC; rooftop/carport >=50 kWAC, front-of-meter. Remote NFPA 855 BESS must grid-charge; co-located resources need separate interconnection.
Material Restrictions	No behind-the-meter, DSM, fossil or other renewables. Storage sizing conflicts: general eligibility says >2 MW; the DER section addresses <=2 MW; another clause again says >2 MW. Confirm with Dominion.

04 | CRITICAL DATES & SUBMISSION

Intent to Bid / Registration	Before bidding, email the Acquisition Intent to Bid and executed Confidentiality Agreement. No deadline; proposals are accepted continuously.
Clarifications / Q&A	Questions: DEVCleanEnergyRFP-Acquisition@dominionenergy.com; no fixed deadline.
Proposal Submission	Rolling / no fixed deadline. Selection notice is generally expected within about 60 days after proposal submission.
Submission Portal	Request dedicated SharePoint access by email, upload the complete proposal and executed exclusivity agreement, then email Dominion that the submission is ready for review.

05 | HOW SUNSTRIPE CAN SUPPORT

PRE-RFP DEVELOPMENT & ENGINEERING

- Solar / BESS sizing and configuration
- Site technical due diligence
- 10% preliminary engineering design
- Interconnection (IX) application support
- PSS®E / PSCAD modelling and validation

RFP SUBMISSION & BID SUPPORT

- Technical proposal preparation
- Bid compliance and documentation
- CAPEX estimation and cost modelling
- Bid engineering and submission support
